OceanMaster Non-Skid Aggregates

Description

A silica sand material designed specifically to provide a professional slip-resistant finish. Available in fine or coarse grits.

For use on

All surfaces together with OceanMaster single or two-pack coatings.

Direction for use

Add to paint to obtain an anti-skid surface for decks and steps area.

Method 1 : Mix 4 to 5% by volume thoroughly into paint before and during application.

Method 2 : Broadcast or sprinkle onto tacky paint film. Apply additional coat of paint without non- skid aggregates the next day.
